

CONTACT EXAM & PROFESSIONAL FEES

What are contact lens professional fees for?

As a contact lens wearer additional tests are done for you that are necessary to make sure your eyes are healthy, that your lenses fit properly and to ensure that you are seeing as well as possible. Contact lens professional fees are for the extra testing and time taken by the staff and doctor each year to properly evaluate your contact lenses

What types of additional test are needed?

Corneal topography is one example of a test done for contact lens wearers. With this computerized data we can detect any undesirable changes of the cornea caused by wearing contact lenses. A second test uses the microscope to examine the fit of the contact lens and the health of the cornea. Thirdly, prescription measurements are done which are different than those for glasses.

Isn't this part of my annual eye exam?

These contact lens-related tests are done in addition to the eye examination. These are procedures that only need to be done for contact lens wearers, not for patients who don't wear contact lenses.

Doesn't my insurance cover contact lens professional fees?

It depends on your plan's coverage. Most insurance plans cover a routine eye exam which determines your glasses prescription and evaluates your eye health. Contact lens services are separate procedures that often are covered by vision insurance plans.

How much does it cost?

Depending on the type of lenses you wear depends on the cost. Contact lens fittings range from \$30 - \$500 depending on the type of lens and condition of the cornea.
